nanoCAD 24 Multilingual Launch
Empowering Users Worldwide

April 17, 2024 – *Nanosoft announces the release of nanoCAD 24 – the first multilingual version of the nanoCAD platform and its specialized modules.*

Nanosoft AS announces the launch of nanoCAD 24, the latest version of the acclaimed CAD platform, now with extensive multilingual support. This release signifies a monumental step forward in making advanced design tools accessible to a global audience, breaking down language barriers, and enhancing productivity across diverse design environments.

"Fostering a global community of designers and engineers is at the heart of what we do at Nanosoft. The introduction of multilingual support in nanoCAD 24 is a testament to our commitment to inclusivity and our desire to provide high-quality CAD solutions that are accessible to everyone, regardless of language," says Frode Rødland, CEO of Nanosoft AS. *"We are proud to offer a platform that not only meets the technical demands of modern design but also embraces the diverse cultures and languages of our user base."*

With comprehensive multilingual support, users around the globe can now experience nanoCAD in English, German, Spanish, French, and Korean, enjoying more intuitive and efficient design work than ever before.

The release of nanoCAD 24 showcases an unparalleled leap forward in CAD technology, embracing global diversity and innovation. The development team, fueled by insightful feedback from our valued users and beta testers, has introduced new features and improvements that redefine the boundaries of CAD software capabilities.

What's New in nanoCAD 24:

- **Layer Manager**: A newly designed toolbar that simplifies layer management.
- **Layer Translator:** A tool to manage, remove, and merge layers.
- **Plot Dialog Update:** Improvements in the plotting experience, including a new "Preview" button.
- **Text Editing Enhancements:** New shortcuts and a function for copying text format.
- **Centroid Snap:** A feature for finding the center of mass of closed objects.
- **Coverings Library Update:** New textures in the sections of Wood, Roofing, Landscape Design.
- **Inquiry Toolbar Update:** A new Area tool for finding area and perimeter.
- **CAD Standards Toolbar:** Includes commands like Standard Settings, Configure, Check, and Layer Translator.
- **ETRANSMIT Command Update:** Improved functionality for sharing drawings.

Nanosoft AS invites the global design community to explore the full capabilities of nanoCAD 24 and leverage these innovative features to bring their creative visions to life with unparalleled ease and efficiency.

Current nanoCAD users with valid paid subscriptions can upgrade to nanoCAD 24 at no additional cost. New and returning users are encouraged to experience the enhanced capabilities of nanoCAD 24 through a 30-day trial version, available now.

As Nanosoft AS continues to pioneer advancements in the CAD software industry, they remain committed to delivering high-quality, cost-effective solutions that empower designers to achieve their best work. The introduction of multilingual support in nanoCAD 24 represents a significant leap towards making advanced CAD tools accessible and user-friendly for designers around the world. By embracing linguistic diversity, Nanosoft AS aims to foster a more inclusive and productive global design ecosystem.

Availability

nanoCAD 24 is available for purchase and trial on the official company website, www.nanocad.com. Users with existing paid subscriptions can access their free upgrade today by logging into their account.

About Nanosoft AS

Nanosoft AS, a global CAD software provider, boasts a community of over 840,000 users across more than 140 countries. Our mission is to empower designers and engineers dedicated to developing innovative, accessible, and cost-effective software solutions. With partners in over 20 countries, we are committed to fostering collaboration and setting new standards in the CAD industry. Nanosoft offers a comprehensive suite of products designed to enhance productivity and improve design workflows, supported by a robust ecosystem that includes free licenses for students and educators, as well as extensive developer support through free API access.
